Name of Study: Agamid-Adenovirus 1(Agamid-AdV1) prevalence in client-owned bearded dragons

Clinical Investigators: Dr. Sosa-Higareda MVZ and Emily Blum

Purpose of Study: Investigate the prevalence of Adenovirus in symptomatic and asymptomatic client-owned bearded dragons in Illinois.

Eligibility: Any client-owned bearded dragon coming in for an exam through the University of Illinois College of Veterinary Medicine, Zoological Medicine Service.

Description of Procedures: Eligible bearded dragons will get an oral and cloacal swab and a small blood sample collection.

Possible Benefits / Owner Incentives: Bearded dragon will be tested for Agamid-Adenovirus 1 (Agamid-AdV1) free of charge.

Associated and Unforeseen Risks: The possible risks for your animal from participation are: mild soreness, irritation, or inflammation of the cloacal region from the swab test. Patients may feel discomfort at the venipuncture (blood draw) site and in rare cases there can be hemorrhage due to inability to clot. Patients may experience additional stress during procedures and restraint. Additionally, there may be unforeseen risks of participation in this study. In the event of unforeseen risks, the investigator will use his or her judgment to guide the care of your animal and discuss options with you when possible under the circumstances. The investigator may terminate your animal's participation in the study if continuation is not in the best interest of your animal or as otherwise deemed prudent or necessary by the investigator.

Confidentiality: Government regulatory agencies and the University of Illinois College of Veterinary Medicine may inspect and/or copy the records for your animal for quality assurance and data analysis. These records may contain private information. Additionally, the investigators may use data generated from this study, including photographs and video images, in scientific journal articles or presentations and for educational purposes. Neither you nor your animal will be identified individually in such articles, presentations, or educational programs.

Compensation and Financial Obligations: You will not have costs from your animal's participation in this study. You will be responsible for any costs associated with the normal course of treatment, the treatment of any complications that may arise, and unrelated medical conditions.

You will not be compensated for your animal's participation in this study

Questions about this project may be directed to:

Dr. Sosa-Higareda MVZ: msosahi@illinois.edu

Emily Blum: erblum2@illinois.edu

Voluntary Participation and Right to Withdraw: Participation in this study is entirely voluntary. Refusal to participate or to continue participation carries no medical penalty, and you are free to withdraw your animal from this study at any time without medical penalty or prejudice. Your voluntary removal will constitute disqualification from further participation in this study.

Required Withdraw and Disqualification: The investigator has the right to terminate the study for any or all participants at any time and for any reason. Your animal may be required to withdraw from the study for violation of eligibility requirements, or noncompliance with restrictions and/or procedures during the study. This also constitutes disqualification. Your animal may also be required to withdraw from the study to protect your animal's health (such as with the occurrence of significant injury, adverse reactions, or illness whether or not a consequence of the study), or if the study is terminated early.

IACUC Approval #: 25098. This research has been reviewed and approved by the Institutional Animal Care and Use Committee (IACUC) of the University of Illinois (UI).

8/2025

Acknowledgements: (Please note: Before being accepted into any clinical trial, all animals must be evaluated and officially enrolled by the study principal investigator. All owners must sign an official study consent form before their animal will be accepted into a clinical trial. The cost of pre-evaluations may be the responsibility of the owner. Please be sure to contact the study investigator if you have any questions or concerns.)

Owner Signature: Your signature indicates: (1) you provide your informed consent and voluntarily agree to your animal's participation in this study knowing and understanding all the risks and requirements stipulated above; (2) you are the legal owner of the animal or are an agent of the owner with authority to consent to the animal's participation in this study; (3) you have not withheld information regarding your animal's medical history; (4) you have read, understood and agree to the terms of this consent form, including but not limited to the purpose and nature of this study and its associated procedures, as well as any possible risks, and all your questions have been answered to your satisfaction; and (5) you agree to hold harmless Board of Trustees of the UI, the VTH, and its officers, employees, agents and assigns from any and all liability, claims and actions that may arise from participation in this study. You will receive a copy of this consent form upon request.
